		Expected outcome	The program's goal is to provide prospective media professionals with technical skills in the field of mass media and communication, as well as theoretical perspectives on the nature and application of these mediums. The goal of the course is to provide students a foundation in journalism while also introducing them to current news and media trends. It offers technical assistance in areas like computer applications, software and hardware for print, the internet, and other media forms. Learners can enhance their capacity to collect, communicate, and present information, as well as get a better understanding of media ethics and leadership roles in media houses.

## Learning Management System (LMS)

### Counselling Process

**Mode of Counselling :-** The Synchronous learner engagement techniques are

**Brief describe the provision in LMS to be used by HEI :-**

Amity University has implemented an In-House State-of-the-Art Learning Management System portal. Following are the key LMS (Learning Management System) features that facilitate the synchronous teaching-learning: 1. Virtual Classrooms: These classrooms are conducted over the LMS, where live sharing of desktop screen, presentations, documents, whiteboards etc. are facilitated between the faculty and learners in real time. It is further supplemented with two-way audio communication channel for the emotional connect of learners and teacher, while the real-time chat feature allows learners with low band width of internet to participate in the session. These classrooms are referred to as "Live Interactive Sessions" and students are also given the opportunity to present themselves in front of the participants. 2. Discussion Forums: The case study/ topic-based discussion forums are moderated by the faculty in both synchronous and asynchronous mode. The faculty are available for live interaction with the students, five days a week, as per the notified schedule. This feature gives an extra edge for engaging students on a daily basis and thereby ensures that the practical approach of the learned topics are grasped by the learners through Case Studies/ topics/ articles. 3. One-on-One student to Faculty interaction (Ask Your Professor): "Ask Your Professor" is a 24 X 7 active interaction feature of the LMS, which can also be accessed through Mobile App, anywhere and anytime. The faculty responds in real time, depending upon their availability and hence encourage better inferences and conceptual clarity of the topics. Also, the above features are enhanced by the auto alert system and notifications.

**Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :-**

Assessment mechanism	At Amity Directorate of Distance and Online Education, assessments are developed pedagogically with a strategic approach to meet the learning outcomes and are delivered online through the LMS. The Continuous Assessment Model of formative nature is distributed evenly throughout the syllabus in three categories: 1. Objective type questions embedded in video lectures 2. Case Study based questionnaires at the end of each module. 3. Peer assessments with self and anonymous feedbacks 4. Live Interactive Session attendance records. 5. Graded Discussion Forums These assessments finally contribute towards the internal marks while evaluating and measuring the learning progress, skill acquisition and achievement of learning outcomes of the learners.
Identified technological interface and interoperability	Identified technological interface and interoperability Amity's UMS (University Management System) provides complete student-life cycle management system for students and LMS (Learning Management System) offers comprehensive online learning solution that includes content consumption, assignments and assessments. Amity maintains a robust tightly integrated, highly scalable and interoperable IT infrastructure supporting the various applications that are required to manage the student lifecycle management from enrolment to graduation. Lead nurturing and conversion through integration of Lead management application. This comes along with a well-

	supported mobile application (both iOS & Android). LMS Features: Teacher and Student Administration, e-learning Programs and Training Contents, Courses and Online Events, Internal Communication System( Built in Mail), inbuilt Analytics for Tracking and Reporting of the e-learning programs, Accessibility features to support differently abled students, Forums to interact between the Students and Teacher, Support of Portability and Standards, Rubrics and Speed-grader modules for transparent evaluation and feedback, Display scores and transcripts, Integration through API and LTI to 3rd party applications.
Learner's Authentication Requirements	The students are provided Unique identifier enrolment number and email ids after validating the Govt Photo Id proof during filling the registration form on Amity Online Registration Platform. Indian Students are asked to submit (AADHAR/DL/PAN card) and students with foreign nationality/NRIs will be submitting valid Passport copy. The submitted documents are then verified by Admission department to authenticate the student. Post Enrolment, all students get a single window authentication system through the Student Portal, that gives them a SSO access to all tools, applications, learning and assessment resources, that they are entitled for.
Learner Registration - through a web application	through a web application The Online Registration System capture student details in 3 steps: 1. Basic information including Address and Identify proof 2. Qualification details and documents to check eligibility 3. Fee Payment to enroll into respective programme.
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	Along with Analytics for active engagement of learners and Reporting Learner's Engagement: Learner's Engagement is a key aspect for attaining the predefined learning outcomes of a course. At Amity University, below are the steps taken toward learner's engagement: • Student onboarding: A month-long series of webinars culminating in an interaction with the Directors. • Late Evening Live Interactive Sessions: A better learning experience through direct interaction with subject matter experts. • One on One Virtual Session: Option of scheduling an online session with the subject matter experts for special interaction on special requests. • Discussion Forums: The discussion forum is a 24 X 7 active platform and can be accessed through mobile App, anywhere and anytime. Learners are encouraged to share their doubts online which are then responded by the SMEs. Globalized perspectives, due to a worldwide distributed learner base promotes cross cultural aspects towards the discussion topics. In addition to resolving doubts, the SMEs also moderate a discussion among learners towards better inferences. • InstaClass: Live on all platforms, where industry experts share their insights and experience on a relevant topic for 5-15 minutes every day. • Meet Your Batchmates: A periodic event to onboard new students and help them interact and break the ice. • Webinars: Leading professionals from different industries come on-board for a live interaction with global learners. • Academic Activities: In addition to the above, various academic activities like Case Study contests, Problem Solving competitions are regularly conducted to engage the learners throughout their course of study. Analytics for active engagement of learners and Reporting: In the field of Online Learning, Learning Analytics is the need of the hour for improving the overall quality of delivery in education and ensuring the accomplishment of learning outcomes of a program. At Amity, learning analytics is incorporated in the LMS, to enhance the learner engagement and report accordingly to counteract on the shortcomings of teaching-learning activities. Below are the key features of the analytics tool: 1) Measure Usage • By monitoring user interactions within the LMS environment, the analytics tool is able to provide a detailed understanding on how LMS is being used by faculty and learners during their teaching-learning process. • Collects user activity data to generate reports. The reports can show adoption on an institution, department, course, or individual user level. • Course activity reports are available for instructors • Live tracking of user activity in LMS, with respect to: - Context (where) - Actions (what) - Time (when) 2) Take Action • Based on the reports, targeted interventions and training could be done • Measure the impact of interventions. • Sending periodic alerts and reminders for due dates and inactivity in LMS
Payment Gateway –using Digital Payment system	Payment Gateway –using the Digital Payment system Admission platform has the provision to pay fees online via various PG (Payu/Zest/Paytm), student can pay fees by using a Credit cards, Debit card and Internet banking.
Tracking the delivery of a Course or programme	Tracking the delivery of a Course or programme To facilitate the online flexibility in delivering a course, the Learning Management System functions as a platform where all the pre, during and post activities of delivery are conducted and monitored. The tracking process for the different delivery phases are: • PRE-Delivery: During this phase, the courses are created with a standard structure which maintains the uniformity for all deliverables throughout all courses. The Subject Matter Expert (SME), LMS Team and Instructional Designers (IDs) work collectively to define the best pedagogical pattern of delivering different types of learning materials. Auditing and continuous monitoring is done by the LMS team to ensure that the same structure is being implemented; as planned. Complementing the same, content auditing ensures the availability of learning materials for all navigation tabs in the LMS. • DURING-Delivery: The Amity Quality Compliance Auditor (AQCA) has a significant role in this phase and ensures that the correct content is delivered to the learners for study. Amity follows "Just in Time" (JIT) technique of Quality Management to ensure the delivery of right content at the right time to the right user. • Post- Delivery: This phase is the most crucial and ensures that the contents are being accessed by learners for completion of learning outcomes. Learning Analytics with graphical reporting helps to track the faculty-learner activities inside a course and helps in promoting learner engagement.
Technical Know-how or Skills Requirements	Technical Know-how or Skills Requirements Though Amity conducts a thorough platform orientation as a part of the student onboarding process. The students must possess these following basic technical skills to succeed in their online learning journey: Accessing the Internet using a computer browser. Using an Internet browser. Downloading, saving, opening, and printing material found online. Composing e-mail/course messages and attaching documents. Posting to a discussion forum. Submitting assignment on LMS. Writing and editing with a word processor, such as Notepad, MS Word, etc. Citing sources in academic submissions. Take online examinations. Using web conferencing tools, such as Google Meet, Zoom, MS Teams etc. Learning new computer skills. Conducting Internet searches.

**Briefly write on ICT facilities available/ to be ready dedicated for the implementation of Online Courses :-**

Amity's UMS (University Management System) provides a complete student-life cycle management system for students and LMS (Learning Management System) offers a comprehensive online learning solution that includes content consumption, assignments, and assessments. Amity maintains a robust and tightly integrated and scalable IT Infrastructure hosted on cloud to manage the student lifecycle management from enrolment to graduation. Lead nurturing and conversion through the integration of Lead management application. Integrated Student Support System built on Fresh-Desk / WhatsApp / SMS / e-Mail modules. The comprehensive Student Information System is built on in-house ERP/UMS and managed by an in-house technology team. The SIS is tightly integrated with the custom-developed Learning Management System (LMS) platform amigo.amityonline.com. Cloud-hosted applications for uninterrupted access. SSO facilitated the movement of users between multiple integrated platforms. The entire personal data of learners is DLP secured. ICT infrastructure is fully protected by dedicated firewalls and 24 X 7 monitor through NMS tools. A dedicated team of SW Development, Server administration, and Network Administrators. End to End (closed-loop) feedback system is implemented to enhance the learner experience. Well supported with mobile application (both iOS & Android).
